> *CEO at Contango IT*

MSP360 Managed Backup Service (MBS) is designed for IT service providers and corporate IT departments that need cloud backup solution with central management and monitoring

Built for Amazon Web Services

MSP360 Managed Backup allows you to connect to your own AWS account to store customers' backups.
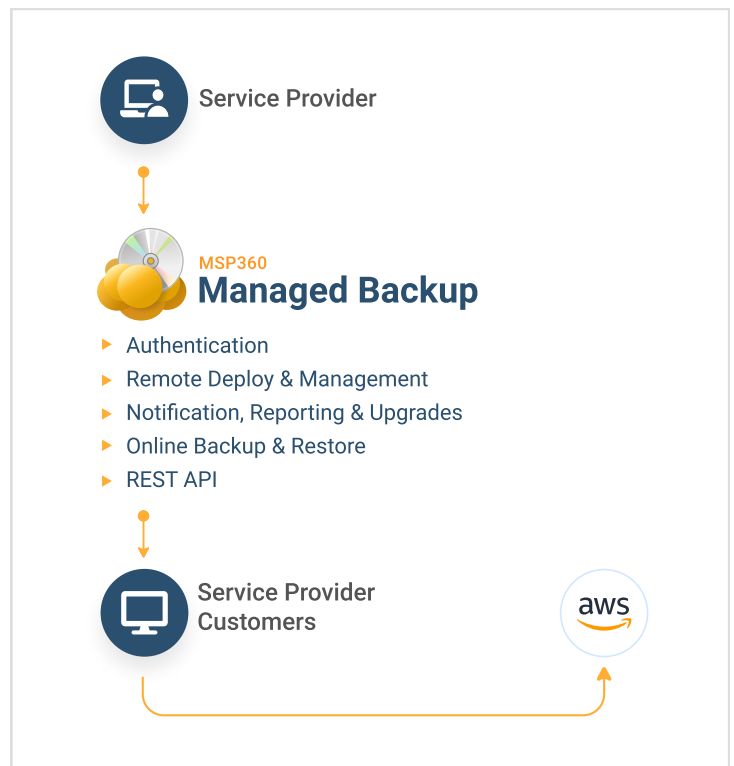

Centralized Management and Monitoring

MSP360 Managed Backup comes with a web control panel, designed to for you to remotely assist your customers during initial backup setup and ongoing support.

Full Rebranding and Customization

MSP360 Managed Backup allows you to rebrand the product and sell it under your own brand. You also can rebrand the control panel as well as customize email notifications that customers get.

How it works:

Service Provider

MSP360
Managed Backup

- Authentication
