Release Notes

December 25, 2019

These release notes provide information about the latest release of MSP360™ (CloudBerry) Backup for Windows 6.2.4.

Contents:

About MSP360™ (CloudBerry) Backup for Windows 6.2.4

MSP360™ (CloudBerry) Backup for Windows 6.2.4 is a minor release, featuring new functionality and enhanced performance. See the New and Updated features section to get a closer look at the novelties. MSP360™ (CloudBerry) Backup is a cross-platform, cost-effective, flexible, and versatile backup and recovery solution that enables businesses and ordinary users to perform automatic backups to various cloud storage services. Advanced features like encryption, compression, and synthetic backups facilitate more efficient, swift, and secure file transfer between your local computer and the cloud. Ultimately, the result is an unmatched conflation of reliable backup, automatic scheduling, and highly customizable backup configuration.

Key benefits

- Cloud backup to Amazon S3, Glacier, Wasabi, Microsoft Azure, Google Cloud, OpenStack, Rackspace, and various other cloud storage services.

- Local backup to hard drives and NAS-like storage solutions.

- Encryption and compression for more secure and swift backups.

- Flexible backup & restore plans.

- Easy setup of backup plans with the ability to configure schedules, retention policy, and email notifications.

- Block-level backup for expedited upload.

New and updated features

Latest version validity check

The new validity check feature performs checks for the presence of all required files in storage destination (except database files) before the next block-level backup run. If some revision is not found in storage, a backup plan is stopped with an appropriate error.

System Requirements

Before installing MSP360™ (CloudBerry) Backup for Windows 6.2.4, make sure that your computer meets the following requirements:

Component	Requirement
CPU	1.4 GHz 64-bit processor
RAM	512 Mb
Disk Space	100 Mb or more
Operating System	Windows 7/8/10 or Windows Server 2008/2012/2016

MSP360

#1 MSP BACKUP

Getting Started

Installation Instructions

1. Download the universal installer from MSP360™ website.

2. Run the Windows installer. If some required software frameworks are missing, the installer will prompt you to fix it.

3. Follow the installation wizard steps. To learn more, refer to the Installation section of the [help documentation](#).

4. Upon the first launch, select the licensing option.

5. Once all is set, you can begin configuring backup & restore plans.
