FEATURES

Fast and Stable Connection

Real-time connection based on the WebRTC technology.

Highest Security Standards

2FA, SSL-encrypted internal and external connections, and password-level security ensure full data protection.

Feature-Rich

File transfer, session recording, text and voice chat, remote printing, and many other features to stay productive from anywhere.

Unattended Access **Standalone** **Managed**

Set up a remote session without a connection partner on the other end.

Management Portal **Managed**

Oversee, run and manage your remote connections from a single web console.

Unlimited Endpoints and Connections **Managed**

Connect to an unlimited number of endpoints with zero limitations.

Web-Based Remote Access to Windows Devices **Managed**

Access Windows devices via a browser without having to install the MSP360 Connect app on your computer.
