

MSP360 Remote Desktop. Simple. Secure.

What is Managed Remote Desktop?

A powerful tool to connect to desktops and servers and provide support for your customers.

- ▶ **Unlimited Endpoints**
- ▶ **Centralized Management**
- ▶ **Secure connection**

[Free Trial](#)

Features

- ▶ **Unlimited Endpoints and Connections**
Connect to an unlimited number of endpoints with zero limitations.
- ▶ **Management Portal**
Oversee, run and manage your remote connections from a single web-console.
- ▶ **Unattended Access**
Connect to and control trusted computers all over the world at any time.
- ▶ **Easy Deployment**
Download, install and automatically configure Remote Desktop on end-points with pre-configured build and silent installation.
- ▶ **Advanced Security**
Get peace of mind with encryption, enhanced ID and PIN verification, and "brute-force" protection.
- ▶ **Reporting**
See full statistics on who on your team has run the session, what endpoint they connected to and for how long.
